

## Hoofdrekenen:

### Vermenigvuldigen met 2,4, 5, 10, 50, 100, 1000, 10000

#### 1 Los op. Noteer de oplossingswijze.

$100 \times 50 = \underline{\hspace{2cm}}$

$2 \times 36\,000 = \underline{\hspace{2cm}}$

$4 \times 6,12 = \underline{\hspace{2cm}}$

$5 \times 0,826 = \underline{\hspace{2cm}}$

$40 \times 612 = \underline{\hspace{2cm}}$

$10,5 \times 40 = \underline{\hspace{2cm}}$

$57,5 \times 1000 = \underline{\hspace{2cm}}$

$10\,000 \times 799 = \underline{\hspace{2cm}}$

$25 \times 40 = \underline{\hspace{2cm}}$

$40 \times 500 = \underline{\hspace{2cm}}$

#### 2 Schatten en oplossen.

	Ik schat.	Ik bereken.	Mijn schatting is	
			goed	minder goed
730 x 5	<hr/>	<hr/>	<input type="radio"/>	<input type="radio"/>
6,01 x 40	<hr/>	<hr/>	<input type="radio"/>	<input type="radio"/>
4 x 98 000	<hr/>	<hr/>	<input type="radio"/>	<input type="radio"/>
50 x 20 100	<hr/>	<hr/>	<input type="radio"/>	<input type="radio"/>
290,5 x 2	<hr/>	<hr/>	<input type="radio"/>	<input type="radio"/>

#### 3 Meervoudige oefeningen. Herleid ze tot één bewerking en los op.

$2 \times 25\,000 \times 2 = \underline{\hspace{2cm}}$

$10 \times 31\,625 \times 10 = \underline{\hspace{2cm}}$

$3,19 \times 50 \times 2 = \underline{\hspace{2cm}}$

$5 \times 3,75 \times 2 = \underline{\hspace{2cm}}$

$4 \times 25 \times 0,084 = \underline{\hspace{2cm}}$

$2 \times 505 \times 2 = \underline{\hspace{2cm}}$

$10 \times 36,5 \times 100 = \underline{\hspace{2cm}}$

$100 \times 0,91 \times 10 = \underline{\hspace{2cm}}$

#### 4 Controleer met de omgekeerde bewerking. Wij geven de werkwijze op.

$5 \times 160\,000 = 10 \times \quad \cdot \quad = \quad \cdot \quad \text{want } \underline{\hspace{2cm}}$

$4 \times 140 = 8 \times \quad \cdot \quad = \quad \cdot \quad \text{want } \underline{\hspace{2cm}}$

$20\,100 \times 10 = 201 \times \quad \cdot \quad = \quad \cdot \quad \text{want } \underline{\hspace{2cm}}$

$8,2 \times 40 = \quad \cdot \quad \times 10 = \quad \cdot \quad \text{want } \underline{\hspace{2cm}}$

$50 \times 14\,600 = 100 \times \quad \cdot \quad = \quad \cdot \quad \text{want } \underline{\hspace{2cm}}$
